DETAILED ACTION

Response to Amendment

1. Applicant's remarks received 24 March 2006 have been entered and overcome the rejections under 35 USC § 112, 2nd paragraph.

Election/Restrictions

2. Claims 1-3, 5-12, and 15 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 13-14, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

3. Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 09 August 2004 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

4. Claims 1-3 and 5-15 are allowed.
5. The following is an examiner's statement of reasons for allowance: Applicant's arguments explaining how Podiak does not teach a spark plug with a sealing ring resting against the insulator body externally at the end of the insulator body are persuasive.
6. Thus, regarding independent claim 1, the prior art of record neither shows or suggests a spark plug comprising, in addition to other limitations of the claim, a center electrode being sealed off from an insulator body by at least one sealing ring surrounding the center electrode, wherein the sealing ring rests against the insulator body externally at the end of the insulator body. Due to their dependency upon independent claim 1, claims 2, 3, and 5-15 are also allowable.
7. The subject sealing ring having the configuration discussed earlier is provided for increasing the compressive strength of the spark plug. The design is new and unique to the art.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
